

CODICE: -

COMPONENTI PER ISOLAMENTO ELETTRICO

IMPIEGO D'USO: -

REFRARC P328

REFRARC P328 – developed with an innovative bond between refractory alumina and silicon oxide.

Key strengths

- Manufacture of complex finned shapes in a single monolithic piece
- High mechanical strength even under severe conditions
- Excellent resistance to thermal shocks and vibrations
- Reduced porosity with water absorption < 5%
- Environmental safety: no radioactive residue or ecological issues
